

Solar Ranking Among Top 10

Your company brought online nearly 250 megawatts of solar generating capacity in Virginia in 2017— enough to serve more than 60,000 homes.

Our customers want cleaner energy. And we are working with them to deliver, producing cleaner air: Between 2000 and 2017, our carbon dioxide emissions rate—the amount of CO₂ emitted per unit of electricity generated—dropped 50 percent.

Others have taken notice of the work of Dominion Energy and its electric subsidiaries in providing clean energy solutions. In May 2018, the Smart Electric Power Alliance ranked Dominion Energy Virginia No. 8 nationally in the number of megawatts of solar added in 2017.

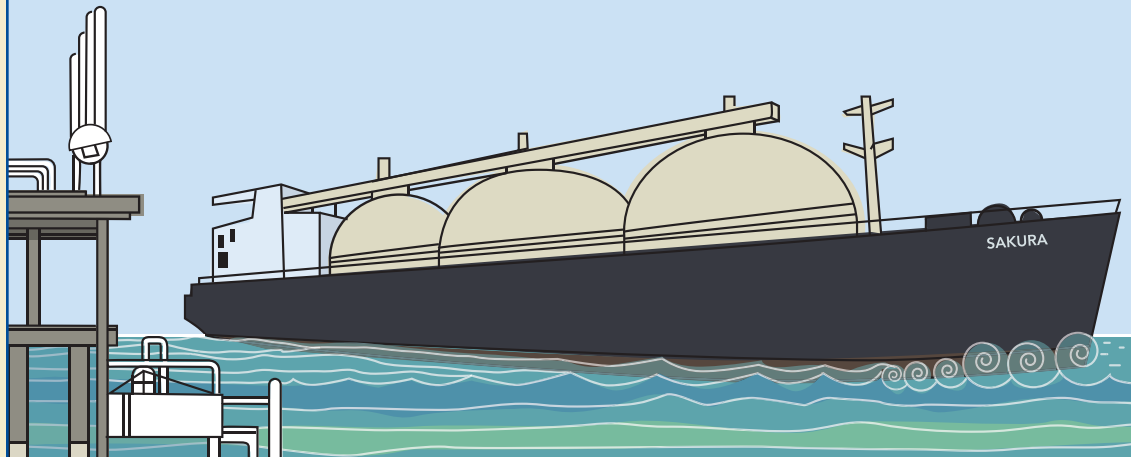

Cove Point Enters Commercial Service

In early April, Dominion Energy's largest ever construction project — the state of Maryland's, too — entered commercial service, liquefying natural gas for export to India and Japan.

Liquefaction capabilities at Cove Point, strategically situated on the western shore of the Chesapeake Bay in Lusby, Md., were completed at a cost of \$4.1 billion. Development began in 2011, and construction in 2014.

"The Cove Point liquefied natural gas (LNG) export project is an environmental, economic and safety success story of the first order," said Tom Farrell, chairman, president and chief executive officer of Dominion Energy, "contributing to lower carbon emissions, improving our nation's balance of trade and creating well-paying jobs onsite and throughout the region."

Cove Point will produce LNG for ST Cove Point, which is the joint venture of Sumitomo Corporation and Tokyo Gas, and for Gail Global (USA) LNG, the U.S. affiliate of GAIL (India) LTD, under 20-year take-or-pay contracts generating about \$700 million of annual EBITDA for Dominion Energy.

Company Hosts 300 At Annual Meeting

On May 9, about 300 shareholders and a handful of their proxies gathered in Richmond, Va., for the company's 2018 Annual Meeting of Shareholders.

Dominion Energy shareholders — 84 percent of outstanding shares voted — approved the company's slate of nominees for the Board of Directors and its choice of an independent auditor (Deloitte & Touche LLP), and gave advisory approval of its executive compensation program (Say on Pay). They also declined to approve a shareholder proposal regarding the right of shareholders to act by written consent.

CEO Tom Farrell also recognized a number of employees for their service to their communities and for volunteering to restore power in Florida and Puerto Rico, and presented a management overview of Dominion Energy's performance over the past year.

In short, your company had an extraordinary year in 2017 because it was safe, reliable, efficient, responsible and customer- and community-focused.

When your 2019 Proxy Statement arrives next spring, please remember that every vote counts and is very important to us.

Your Company Is Committed ...

To Employee Volunteerism

Each year, Dominion Energy employees volunteer more than 100,000 hours of their time to worthy causes, supporting education, environmental stewardship, vitality and critical needs in their communities. In 2017, they dedicated almost 125,000 volunteer hours.

At a Richmond luncheon in April, your company honored six employees with a Benjamin J. Lambert III Volunteer of the Year Award for their outstanding efforts. The awards — recently named for a former longtime board member who passed away in 2014 — are in their 34th year. Farrell described the recipients as representing a “culture of caring [that] is truly in our employees’ DNA.”

Recognized were six individuals — Don Cline, Lisa Culll, Sandy Easley, Justin Huggard, Diane Simon and Katie Taylor — who are from three states and work in all four of Dominion Energy's business units.

To Customers in Need

Through 2028, Dominion Energy Virginia, serving more than 5 million Virginians, expects to spend \$130 million on its 36-year-old EnergyShare program to provide heating and cooling bill assistance and “weatherization” of homes, making them more efficient throughout the year.

The program was recognized by and expanded in the Grid Transformation and Security Act, which passed the Virginia General Assembly this spring and helps better serve customers in need.

This newsletter contains forward-looking statements that are subject to various risks and uncertainties. Discussion of factors that could cause actual results to differ materially from management's projections, forecasts and estimates are detailed in the company's most recent Securities and Exchange Commission filings on Forms 10-Q and 10-K.
