

Fall 2022

A newsletter for investors of Dominion Energy

BrightSuite Offers Sustainable Energy Solutions

A Dominion Energy subsidiary, BrightSuite, is offering solar installation and financing to Virginia residents. With just a few clicks of the mouse, homeowners can learn if their homes are a good fit for solar and, if so, how much they can save on energy costs.

Although the services provided by BrightSuite are not affiliated with those offered by Dominion Energy Virginia, BrightSuite operates with the same focus on safety, reliability, and excellence.

BrightSuite also provides solar solutions for commercial and industrial customers. It has installed 18 megawatts (DC) on commercial, industrial, and school rooftops in Virginia and Connecticut since 2020.

Dominion Energy Aims To Provide Affordable Service

Your company is committed to safely providing reliable, affordable, and sustainable energy to Dominion Energy’s 7 million customer accounts representing more than 20 million people and businesses.

During these uncertain economic times, with inflation more than quadruple historical rates, affordable utility service is as critical now as ever to customers, communities, and regulators.

While the company transitions to a clean-energy future, there are costs of upgrading infrastructure and replacing higher-emitting sources with lower-emitting ones.

Since 2009, the company’s Dominion Energy Virginia electric utility, serving 2.7 million customer accounts in Virginia and northeast North Carolina, has invested tens of billions of dollars in electric transmission and distribution, and in more than 5 gigawatts of new power stations that collectively have reduced the utility’s carbon emissions.

And such investments have been a good value for Dominion Energy Virginia customers.

Based on data from the U.S. Census Bureau, the share of a Dominion Energy Virginia customer’s wallet attributable to the customer’s utility bill has declined over the years — a testament to the fact that rates have remained relatively stable despite an overall increase in utility investments and in household income during that time.

Dominion Energy is proud to have rates today that remain below the national and various regional averages. Even after factoring in the utility’s most recent fuel filing, rates are 8% lower than the national average.

Historic Residential Bill Growth Rate (2008–22)*

Current Rate (cents/kWh)*

DERI Offers Premium Rates, Instant Access

If you are looking for premium short-term rates with instant access to your money, then **Dominion Energy Reliability Investment, or DERI**, is for you.

Similar to a money market account, DERI allows investors immediate access to their cash with a premium floating interest rate and check-writing privileges — with no maintenance fees.

DERI enrollment is easy, and includes an online portal for investors to manage their investment and transfer money in or out by linking bank accounts. The minimum investment is \$1,000 and DERI's tiered interest rate approach allows investors to select the right investment balance for their financial goals.

See current rates by visiting our website at: Investors.DominionEnergy.com/DERI

Offers are by means of prospectus filed with the U.S. Securities and Exchange Commission (SEC). The prospectus and other information regarding DERI Notes are available for free at www.sec.gov or DominionEnergy.com/DERI or by mail by calling, toll-free, (866) 876-0001.

Reliability Update

69

The average number of minutes out for Dominion Energy South Carolina's electric customers over the past 12 months, better than the utility's calendar-year record of 75 minutes in 2021.

Your Company Is Committed ...

To Coastal Resilience

In 2021, company's philanthropic arm, the Dominion Energy Charitable Foundation, funded a \$100,000 grant for the Elizabeth River Project in Norfolk, Va., to help build a resilience lab that will showcase how to redevelop urban coastal sites for environmental resilience to rising sea levels.

In 2022, the foundation committed \$250,000 to Old Dominion University's "Recover Hampton Roads" initiative. This effort will focus on decreasing the current disparities of severe storm impacts on vulnerable communities through a range of programs and functions, including working directly with nonprofits providing for food security, wellness, and mental health services to families displaced after a natural disaster.

To Helping Customers

With its signature EnergyShare program, for 40 years Dominion Energy has been helping customers with their heating and cooling bills — and — more recently — through home weatherization.

Since its inception, the program has assisted nearly a million individuals and families with their energy needs in Virginia, Ohio, and the Carolinas, including helping to make more than 20,000 homes more efficient.

To mark this milestone, in August the company began weatherizing "40 Homes in 40 Days" in advance of winter to ensure that windows, insulation, heat pumps, electric baseboards, and more can keep the heat inside to use less energy.

This newsletter contains forward-looking statements that are subject to various risks and uncertainties. Discussion of factors that could cause actual results to differ materially from management's projections, forecasts and estimates are detailed in the company's most recent U.S. Securities and Exchange Commission filings on Forms 10-Q and 10-K.
